

Proficiency Testing in EMC

METAS has been offering a new service for Proficiency Testing in EMC since January 2018.

A set of round robin devices is available for bilateral comparison as well as for interlaboratory comparisons:

Conducted Emission	CISPR 16/22/32
Radiated Emission (simple EUT)	CISPR 16/22/32
Radiated Emission (complex EUT)	CISPR 16/22/32
Conducted Immunity	IEC 61000-4-6
Radiated Immunity (in Development)	IEC 61000-4-3
Surge (in development)	IEC 61000-4-5
